# **Statements & Objectives**

CATS Global Schools is committed to providing a safe environment for its employees, students and visitors and will ensure, so far as is reasonably practicable, that the risk from fire will be managed in such a way as to prevent injury or ill-health to employees, visitors, contractors, and others who maybe affected by the activities of the organisation.

Fire is recognised as a major threat to the activities of CATS Global Schools; an outbreak of even asmall fire creates risk to both life and property, damage to the environment and may compromise our normal business activities.

The organisation will ensure, so far as is reasonably practicable, that the risk associated with fire will be managed in compliance with relevant legislation. The objectives of this Policy are, so far asis reasonably practicable:

- To ensure compliance with all relevant legislation.
- To ensure effective liaison with the local fire authority where appropriate.
- To undertake suitable and sufficient fire risk assessments of all premises andactivities within premises.
- To identify and implement reasonably practicable control measures to control risksfrom fire.
- To set out the fire safety framework and procedures and identify the management of this framework.
- To conduct regular fire evacuation drills and testing of emergency equipment.
- To conduct regular fire safety inspections.

# Application

The Policy applies to all premises and activities falling under the Organisation's control. ThisPolicy sets out the framework by which CATS Global Schools and its employees will adhereto in order to meet their fire safety duties.

# **Organisational Responsibilities**

CGS is committed to providing a safe environment for its employees, students, and visitors. Part of this safety responsibility is in the provision and management of fire safety systems and procedures. All members of CATS Global Schools, students, visitors, and contractors have a statutory responsibility in ensuring compliance with the law and complying with the fire safety provisions defined within this Policy.

## - Executive Team

Under UK legislation, the Regulatory Reform (Fire Safety) Order 2005, CATS GlobalSchools is the legal Responsible person as outlined in the legislation. Fire safety management duties will be delegated throughout the team or externally to:

- Assess the risk posed by fire to the health and safety of the employees and to anyoneelse who may be affected by their activities; and
- Eliminate those risks as far as is reasonably practicable or to otherwise reduce thoserisks to a tolerable level.

To ensure this requirement is met and to ensure fire safety is managed across the Group inall locations including outside of the UK the Executive Team is responsible for ensuring current fire legislation is met and that fire safety management is implemented. On a day-today basis this responsibility is delegated to individuals within CATS Global Schools.

The 'Responsible Person' will ensure that:

• Adequate resources are made available to enable CATS Global Schools to fulfil theirduties under relevant fire safety legislation.

### - Directors

- Have responsibility to ensure that the nominated personnel are aware of their roleand are given the time and training to carry out this role.
- To ensure that the management of fire safety is understood and implemented as perthis Policy.

## - Centre Heads, Operational Site Roles

Employees in these roles would be considered 'Responsible Persons' on a day-todaybasis and are responsible for ensuring:

- The significant findings of fire risk assessments are properly addressed, and suitablecontrol measures implemented.
- All premises' features (fire doors, partitions etc.) and equipment provided for assuringfire safety is maintained by a competent person and are in a state of efficient workingorder and good repair.
- All new and refurbished areas are designed to ensure compliance with this Policy and the requirements of any relevant fire safety legislation and fire safety Policies.
- Where relevant, contractors undertake a fire risk assessment before commencing works on site; this should be made available to CATS Global

- CATS Global Schools liaises and co-operates as required with other responsible persons e.g., tenants and contractors to ensure that they are aware of CATS Global Schools' Policy and to identify any risks arising from their activities that could impactupon CATS Global Schools, its employees, students, and others using the premises.
- All activities and processes under the control of the Centre Head, Operational Manager etc, where appropriate, are assessed for fire safety and suitable control measures implemented in accordance with the principles of control as outlined in firelegislation.
- All their employees are given training and instruction in fire safety in relation to theiractivities.
- Enough people are appointed as fire wardens, taking in to account the size of the site, numbers of persons and fire risk levels and
- All employees, visitors and contractors comply with the requirements of the firesafety Policy.

## - Group Director of Property and Operations

The Group Director of Property and Operations will ensure:

- Fire risk assessments are in place with site responsible persons and thatsignificant findings are being dealt with
- Competent fire safety advice is available to enable CATS Global Schools to comply with its duties under this Policy, relevant fire safety legislation and anyother relevant legislation and Policies.
- The fire safety Policy and statutory requirements are monitored and reviewed.
- Ensure that appropriate fire safety information, instruction and training is madeavailable to employees as and when required and
- Appropriate guidance is developed to enable the requirements of the Policy to beproperly implemented.

## - All Employees

All employees have a responsibility to comply with the fire safety Policy. This includes,but is not limited to:

- Observing all instructions, information and training intended to secure fire safety;
- Co-operating with CATS Global Schools on matters of fire safety;
- Not interfering with any building fabric or equipment provided in conjunction with assuring fire safety and
- Reporting any obvious defects or shortcomings in fire safety procedures.

• All employees, visitors and contractors falling under their control comply with the CATS GLOBAL SCHOOLS 6

requirements of the Fire Safety Policy.

Students have a responsibility to comply with the Fire Safety Policy. This includes, but isnot limited to:

- Observing all instructions, information and training intended to secure fire safety
- Co-operating with CATS Global Schools on all matters relevant to fire safetyincluding participation in drills or other necessary exercises.
- Not interfering with any building fabric or equipment provided in connection withassuring fire safety for example the fire alarm, fire extinguishers or fire doors;
- Reporting any obvious defects or shortcomings in CATS Global Schools firesafety provision
- Complying with the terms and conditions of any lease agreement for rentedaccommodation.

## - Contractors

Contractors are required to:

- Assess the fire safety risks arising from their works/activities and implementcontrol measures.
- Co-operate with CATS Global Schools on all matters of fire safety;
- Inform CATS Global Schools immediately if any activities undertaken on CATS Global Schools premises may impact on fire measures put in place e.g. hot works
- Ensure that they and all personnel falling under their control, including subcontractors, have received appropriate information, instruction, and training to enable them to comply with this Policy and the sites emergency arrangements.
- Obey all instructions relating to fire safety given by authorised members of CATSGlobal Schools.
- Sign in at site to ensure that they can be accounted for in the event of anevacuation.

When contractors are required to work on site, it will be the responsibility of the personwho has engaged them to ensure that:

- The contractor is aware of and complies with the above.
- Any fire safety provision necessary for the works is in place prior to their commencement.
- That any risk assessment, method statement or contract agreement reflects theneed to manage fire risk

• Any works that require use of a naked flame or that may produce heat mechanically are controlled with a hot work permit or equivalent; this should beagreed in advance of any works.

Where works are requested or put in place by a university partner, landlord or other external persons they should provide or put in place the above with the responsible person to ensure any safety measures are shared with employees and others utilising the site.

## - Visitors

- Members of the public or other visitors should be made aware of the fire emergencyevacuation plan for the site, this can be achieved with the use of fire action notice signage and/or verbally by reception staff as appropriate.
- All visitors must sign in at site to ensure that they can be accounted for in the eventof an evacuation.
- Any persons bringing in a visitor must ensure that the visitor is aware of the aboveand that they are able to account for their whereabouts in the event of a fire evacuation.

## - Neighbouring Tenants

• Any CATS Global Schools site, which has shared premises, should ensure that communication is established with the other tenants so that fire information can beshared. The responsible person should initiate this communication.

# **Fire Risk Assessment**

UK sites - Responsible Persons must ensure that a fire risk assessment is undertaken for their site, that this document and any actions within it are maintained and kept up to date. Fire risk assessments should be undertaken by a competent person with the relevant training and expertise, if using an external contractor, the contractor should be a member of the Institute ofFire Engineers (IFE).

The fire risk assessment should be reviewed:

- Annually
- Following any physical changes to the site or
- If the activities carried out by CATS Global Schools on the site are to change

For all leased properties, a copy of any fire risk assessment should be shared with the property owner or managing agent if requested. For properties in shared premises, a copy of the fire riskassessment for shared areas of the building should be obtained from the property owner or managing agent.

# **Fire Alarms and Evacuation**

#### - Fire Emergency Evacuation Plan

Each site is required to have in place a fire emergency evacuation plan; this should be recorded as part of the fire log.

#### - Calling the Fire and Rescue Service

Where a fire is detected by automatic fire detection, the alarm will be raised automatically via amonitored alarm fire safety system. If this is not in place, a plan for contacting the Fire and Rescue service needs to be implemented and communicated. For example:

Dial 999; request the attendance of the Fire and Rescue Service, informing the operator of theexact address, location, and an indication of the nature of the call, e.g.: automatic fire alarm activation on the Insert example centre, cause unknown.

#### - Fire Drills

It is a legislative requirement that regular fire alarm drills are carried out at regular intervals. Fire drills should be carried out once each term as a minimum on all sites. The responsible person canselect the date and time of the drill. In a boarding setting once a term for each of 'day' and 'dark' Results of these drills should be recorded and kept as part of the fire log; this report should create a record of any deficiencies or lessons learned from the fire drill. Accidental activations should also be recorded and form part of the log.

Where CATS Global Schools operates on a site managed by a University/landlord a drill schedule should be established and any recorded drills communicated between both parties.

#### - Use of Lifts

The use of lifts during a fire or an alarm activation is strictly prohibited, unless the premises havean evacuation lift specifically provided for evacuation purposes. These lifts are provided for the safe and efficient evacuation of persons with specific physical impairments and must only be operated by trained personnel. Under no circumstances should evacuation lifts be operated by anyone other than trained personnel.

Where a relevant premise has a refuge area incorporated within a protected zone it is required to have a clear means of communication between the designated refuge area and another person in a safe zone. It is the responsibility of CATS Global Schools to ensure evacuation of persons with a physical or mental disability can be carried out and without reliance on the Fire and Rescue Services; this includes any visitors.

# **Personal Emergency Evacuation Plan (PEEP)**

Any person that may require assistance in evacuating during an emergency is required to have a

CATS GLOBAL SCHOOLS

Personal Emergency Evacuation Plan (PEEP) in place. The PEEP form should be completed by the person requiring the PEEP and the person responsible for them:

- Employees should complete the PEEP with their line manager
- Any student identified as requiring a PEEP should be taken through the PEEP process toensure theyare aware and comfortable with the arrangements put in place for them. ThePEEP should becompleted with the student and an appropriate member of personnel from the School/College
- Visitors should complete the PEEP with the person responsible for bringing them to site

PEEPs should then be submitted to the responsible person for site, or a person that should be named in the fire emergency evacuation plan. These details should then be shared with fire wardens or others involved with the evacuation process. Any information on these forms should be treated confidentially.

#### - Evacuation Chairs

Local managers should consider the arrangements that may be required to assist visitors with physical impairments in their area where evacuation becomes necessary. Evacuation chairs maybe one way of assisting personnel from the building, if in place chairs should be regularly maintained and any employees that are involved in their use should undergo training.

## **Fire Wardens**

Fire warden processes are in place across all CATS Global Schools sites. The purpose of these processes is to ensure that all evacuating personnel have left the building and report any issues. Fire wardens should also play a part in preventative fire management.

Fire wardens are responsible for undertaking sweeps throughout the building in the event of analarm activation, they then help control the fire assembly point, and collate information to share with the person responsible for coordinating the evacuation and the Fire and Rescue Service.

Information on who the fire wardens are for each building should be displayed in a prominentplace so that employees and students can become familiar with them. Procedures on how thefire wardens should complete their tasks onsite and how these feeds into the building management should be in place for each CATS Global Schools' site.

Fire Wardens responsibilities include but are not limited to:

- Implementing and managing the company's fire and emergency procedure in case of anemergency, including safe evacuation.
- Ensuring that fire prevention and fire-fighting equipment e.g. extinguishers, fire blankets, procedures and notices are maintained, readily available and visible in conjunction with site health and safety responsible person.

Informing new employees in their area of responsibility of fire arrangements

- Recording any findings during fire drills or evacuations and sharing these with site responsible health and safety person, health and safety champion and health and safetymanager
- Working with the site responsible person to ensure the fire alarm system is tested regularly in line with manufacturers' recommendation, for some sites this will be carriedout in conjunction with building management or partner University
- Keeping gangways and fire exits clear
- Assist in the implementation of recommendations following any fire incident to preventtheir recurrence
- Aiding any staff, students or visitors who may be under a Personal EmergencyEvacuation Plan(PEEP)

# Training

Fire Wardens should undergo fire warden training for their role. Refresher training must be carried out at regular intervals no less than every 3 years. Fire warden training should include:

- Legislative requirements
- Fire safety principles
- Record keeping
- Safe evacuation
- Detailed fire safety guidance

#### - Procedure run-throughs

Fire warden teams should carry out procedure run-throughs, without activating the alarm system. These should be conducted half termly. This allows the fire wardens to practice procedure and ensure they meet the needs of the site, giving the opportunity to make any improvements to procedure if required. Records of these run-throughs should be kept onsite.

# **Fire Safety Training**

#### - Statutory Requirements

Responsible persons and line managers shall ensure that all employees within their management control receive regular fire safety training and all new employees undertake fire safety training assoon as possible following their start date. This will be achieved with an online training system.

Where young persons (under the age of 18) are employed, account must be taken of their lack ofawareness, inexperience and immaturity when assessing work-based tasks and the impact this may have on fire safety arrangements. This should be addressed through a young person risk assessment.

#### - Fire Inductions

All new employees must be informed of the fire safety provisions that are relevant to the workplace. The line manager is responsible for ensuring that arrangements are made to

ensurenew employees are advised of the following.

- Fire action arrangements, including the Fire Safety Policy
- Means of escape within the premises
- Location of fire exits
- Location of firefighting equipment
- Details in relation to relevant findings of the fire risk assessments and dangeroussubstances.

#### - Fire Safety Training

All employees must undertake fire safety awareness training; this training should be refreshedevery 3 years and can be undertaken face to face or online.

General fire safety awareness should include the following topics as a minimum:

- The common causes of fire
- The behaviour of fire
- Fire prevention
- What to do if a fire breaks out
- How to use fire extinguishers
- Raising the alarm and personal safety
- Emergency evacuation procedure
- Means of escape

## Maintenance

Regular maintenance, inspections and testing are required to ensure that any systems or items provided for fire safety are kept in good condition and operational. This would include but is notlimited to the fire alarm system, sprinkler systems, and fire extinguishers. Emergency lighting, fire doors, external fire stairs and signage.

The responsible person is required to ensure that trained and competent persons carry out anymaintenance, testing or inspections. If this work is carried out by an external company or University partner clarification should be sought as to what testing is carried out at what frequency and whether CATS Global Schools is responsible for any of this testing, this should then be documented.

#### - Fire Logbook

A fire logbook is a record of all actions carried out to maintain fire safety systems, this should beavailable for review by the Fire and Rescue Service if requested and forms part of fire safety management.

#### - Fire Doors

Fire doors are designed to restrict the spread of fire and smoke and they will normally have a self-closing device. All fire doors marked as a fire door should be kept closed at all times. The useof wedges and other items as hold open devices is not permitted and should be actively managed.

The use of electromagnetic hold open devices on fire doors or Dooryard products may be used as an alternative way of holding frequently used doors open. These devices could impact on firesafety so a fire risk assessor should be consulted.

#### - Exit Routes

All fire exit routes must be clearly marked with fire signage, no equipment or materials may be stored in any protected exit route or staircase. All exits should be kept clear from all obstructionsat all times; final exit doors should be easily opened and do so in the direction of travel.

Combustible materials should not be placed on the walls, floors or ceilings in these areas as faras is possible.

Any routes that form part of the escape route should be kept clear and free of any hazards ormaterials that could create an ignition source or fuel for a fire. I.e. photocopiers, furniture, vending machine.

## Storage

Storage of combustible materials should not be permitted in plant rooms, boiler rooms, servicevoids and shafts, electrical main or sub switch rooms or any other space or room with a fixed source of ignition.

Storage of any description should not be permitted in escape stairs or corridors unless within alocked cupboard which is separated by fire-resisting construction and with fire-resisting doors.Regular checks and cleaning of these areas should be carried out to ensure that waste and unauthorised storage do not accumulate.

# **External/Internal Waste Containers & Refuse Bins**

#### - Internal Waste

Good housekeeping should be practiced on all sites, bins should be emptied regularly, and wasteshould not be allowed to accumulate under desks. Care should be taken to ensure waste does not build up near to or blocking vents of electrical equipment, in particular around photocopiers.

#### - External Waste

External waste bins are a potential fire hazard and need to be controlled. They should be locatedin a secure area away from the building and access to the bins should be restricted to prevent

unauthorised access reducing the potential threat from arson.

If works require the use of a waste skip, then this should be located away from the building 6 metresminimum should be used as a guide.
